

DATES

Three Events

The three main AAA events are:

- The international scientific symposium, which laid the scientific foundation for the initiative;
- The high meeting on the AAA initiative that will bring together, the 29th and 30th of september, all the stakeholders of the initiative;
- COP22, United Nations Conference on Climate Change.

International scientific symposium July 14, 2016 – Skhirat (Morocco)

On July 14th, 2016, almost 100 international scientists gathered in Skhirat. This was an opportunity for them to share their scientific reflections and put forward solutions around the three technical pillars of the Adaptation of African Agriculture: soil management, agricultural water control and climate risk management. Among the participants, there were representatives of the IPCC, the UNFCCC, the FAO, the INRA (Morocco), the International Center for Development and Climate Change (Canada), AfricaRice, the General Council for Agricultural Development (Morocco), and various African universities.

“ Given the existing challenges, science is called upon, today more than ever before, to provide the appropriate answers to solve the problems facing African agriculture because of climate change ”

Prof. Mohamed Badraoui, INRA Director, Morocco

High Meeting on the
AAA Initiative

[More](#)

Launched upstream of COP22 organized in Morocco, the initiative for the Adaptation of African Agriculture (AAA) aims to reduce the vulnerability of Africa and its agriculture to climate change.
